#### **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

#### AXONICS MODULATION TECHNOLOGIES, INC.

Date: August 6, 2020 By: /s/ Raymond W. Cohen

Raymond W. Cohen Chief Executive Officer

#### **Axonics® Reports Second Quarter 2020 Results**

**IRVINE, CA – August 6, 2020** – Axonics Modulation Technologies, Inc. (NASDAQ: AXNX), a medical technology company that has developed and is commercializing novel implantable sacral neuromodulation (SNM) devices for the treatment of urinary and bowel dysfunction, today reported financial results for the second quarter 2020 and provided an update on operational initiatives.

#### **Financial Highlights**

- Net revenue was \$15.2 million in the second quarter ended June 30, 2020 as compared to net revenue of \$1.5 million for the same period of the prior year. Net revenue for the first half of 2020 was \$41.5 million as compared to \$2.6 million for the first half of 2019.
  - As previously disclosed, new order flow was de minimis in April due to COVID-19 related restrictions on elective procedures and began a gradual recovery in early May as restrictions were lifted in certain states. New orders in June continued to improve. Average weekly new order flow in June was approximately 70% of the weekly average achieved in the first quarter of 2020 prior to the COVID-19 related postponement of elective procedures in mid-March.
- Axonics raised \$140 million of net proceeds in a public equity offering in May 2020. As of June 30, 2020, cash and cash equivalents were \$288 million.

#### **Business and Clinical Highlights**

- Through the end of July 2020, over 540 unique accounts (hospitals and ambulatory surgery centers) in the U.S. have implanted the Axonics r-SNM System® in patients on an outpatient basis since the product launched in November 2019.
- Since the U.S. launch, over 135 corporate agreements have been signed with national and regional integrated delivery networks (IDN) as well as large urology groups and ambulatory surgery centers. Included in this group are agreements with 12 of the largest 17 national IDNs in the U.S.
- Axonics recently reported 2-year topline clinical results from its ARTISAN-SNM pivotal study. At 2-years post-implant, 88% of all patients were therapy responders, consistent with the 89% therapy responder rate reported at 1-year. The 2-year results demonstrate that patients continue to experience clinically meaningful and statistically significant improvements in urinary urgency incontinence symptoms and quality of life. Eighty percent of patients achieved >75% reduction in symptoms, with 37% being completely dry. There were no serious or unanticipated device related events.

#### **Regulatory Approvals**

- In April 2020, the U.S. Food & Drug Administration (FDA) approved a next generation rechargeable implantable neurostimulator (INS) for the Axonics r-SNM System under a premarket approval (PMA) supplement. The new INS extends the recharge interval for patients to only once a month for about one hour and for some patients, only once every two months. The next generation Axonics INS is shipping to U.S. customers this week.
- In June 2020, the FDA approved a new wireless patient remote control with SmartMRI<sup>TM</sup> technology for the Axonics r-SNM System under a PMA supplement. The new remote control simplifies the process by which patients can receive a full-body MRI. An MRI technician can perform a simple check using a patient's remote control immediately prior to an MRI, avoiding the need for the patient to visit their implanting physician's office or involving personnel from Axonics.

• In July 2020, the FDA approved 3T full-body MRI conditional labeling for the Axonics r-SNM System under a PMA supplement. With this incremental approval, the Axonics device is MRI compatible for both 1.5T and 3T full-body scans.

Raymond W. Cohen, Axonics CEO, commented, "Axonics was exceptionally productive in the second quarter, having built a significant quantity of finished goods inventory, signed numerous IDN agreements, added over 110 new accounts, and gained several FDA approvals. Despite COVID-19 flare-ups in certain geographies, based on the number of accounts that have switched to Axonics and the trajectory of new order flow in July, we are confident that Axonics is well positioned for continued strong growth in the second half of 2020."

Mr. Cohen continued, "The responder rate from the ARTISAN-SNM pivotal study is the highest success rate ever reported in SNM clinical literature and will soon appear in print in a peer-reviewed journal. More importantly, these results are being replicated by hundreds of physicians in commercial cases all over the U.S. These clinical results, when combined with other key features of our SNM System such as a 15+ year life, recharging only once per month for an hour, full-body MRI compatibility, and ease of use create significant and distinct advantages over the competitive offering. The overwhelmingly positive feedback from physicians, their staff and patients on their experience with Axonics supports our conviction that SNM is poised for significant market expansion in the years ahead."

#### **Second Quarter 2020 Financial Results**

- Net revenue was \$15.2 million in the second quarter 2020, as compared to net revenue of \$1.5 million for the same period of the prior year. Net revenue from the U.S. accounted for \$14.6 million, with select European markets and Canada accounting for the balance of second quarter 2020 revenue.
- Gross margin was 44.4% in the second quarter 2020, as compared to 48.1% for the same period of the prior year. The decrease in gross margin was primarily due to lower overhead absorption related to the COVID-19 pandemic in second quarter 2020. Management anticipates gross margin will return to the low to mid sixty percent range in the second half of 2020 and anticipates the low to mid seventy percent range over the longer-term.
- Operating expenses were \$26.2 million in the second quarter 2020, as compared to \$20.0 million for the same period of the prior year. This increase was primarily due to higher personnel costs for the U.S. commercial team and in other parts of the organization.
- Net loss was \$19.8 million in the second quarter 2020, as compared to a net loss of \$19.1 million for the same period of the prior year. Cash used in operating activities in the second quarter 2020 was \$13.0 million.
- As of June 30, 2020, cash and cash equivalents were \$288 million.

#### **Webcast and Conference Call**

Axonics will host a conference call today, August 6, 2020, at 4:30 p.m. Eastern Time, to discuss financial results and recent business developments.

Interested parties may access the live teleconference by dialing 866-687-5771 (U.S.) or 409-217-8725 (International) and using conference ID 2397731.

A live webcast of the conference call may be accessed by visiting the Events & Presentations section of the Axonics investor relations website at <u>ir.axonics.com</u>. A replay of the webcast will be available shortly after the conclusion of the call and will be archived on the Axonics website for 90 days.

#### **About Axonics Modulation Technologies, Inc.**

Axonics, based in Irvine, Calif., has developed and is commercializing novel implantable SNM devices for patients with urinary and bowel dysfunction. These conditions are caused by a miscommunication between

the bladder and the brain and significantly impacts quality of life. Overactive bladder affects an estimated 87 million adults in the U.S. and Europe. Another estimated 40 million adults are reported to suffer from fecal incontinence/accidental bowel leakage. Axonics SNM therapy, which has been clinically proven to reduce symptoms and restore pelvic floor function, is now being offered at hundreds of medical centers across the U.S. and in dozens of select hospitals in Western Europe. Reimbursement coverage is well established in the U.S. and is a covered service in most European countries. The Axonics System is the first long-lived rechargeable SNM system approved for sale in the world, and the first to gain full-body MRI conditional labeling. For more information, visit <a href="https://www.axonics.com">www.axonics.com</a>.

#### **Forward-Looking Statements**

Statements made in this press release that relate to future plans, events, prospects or performance are forward-looking statements as defined under the Private Securities Litigation Reform Act of 1995. Words such as "planned," "expects," "believes," "anticipates," "designed," and similar words are intended to identify forward-looking statements. While these forward-looking statements are based on the current expectations and beliefs of management, such forward-looking statements are subject to a number of risks, uncertainties, assumptions and other factors that could cause actual results to differ materially from the expectations expressed in this press release, including the risks and uncertainties disclosed in Axonics filings with the Securities and Exchange Commission, all of which are available online at <a href="https://www.sec.gov">www.sec.gov</a>. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Except as required by law, Axonics undertakes no obligation to update or revise any forward-looking statements to reflect new information, changed circumstances or unanticipated events.
