- QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the quarterly period ended March 31, 2022
or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File Number: 001-38721

Axonics, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

26 Technology Drive
Irvine, California
(Address of principal executive
offices)

45-4744083
(I.R.S. Employer
Identification Number)

92618
(Zip Code)

(949) 396-6322
(Registrant's telephone number,
including area code)

Securities registered pursuant to Section 12(b) of the Exchange Act:

<u>Title of class</u>	<u>Trading symbol</u>	<u>Name of exchange on which registered</u>
Common stock, par value \$0.0001 per share	AXNX	Nasdaq Global Select Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 3, 2022, 47,070,097 shares of the registrant's common stock, par value \$0.0001 per share, were outstanding.

Special Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve risks and uncertainties, including statements based on our current expectations, assumptions, estimates and projections about future events, our business, financial condition, results of operations and prospects, our industry and the regulatory environment in which we operate. Any statements contained herein that are not statements of historical facts may be deemed to be forward-looking statements. In some cases, you can identify forward-looking statements by terms such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “should,” “will,” “would” or the negative of those terms, or other comparable terms intended to identify statements about the future. Forward-looking statements include, but are not limited to, statements about:

- unanticipated safety concerns related to the use of our products;
 - U.S. Food and Drug Administration (FDA) or other U.S. or foreign regulatory or legal actions or changes affecting us or our industry;
 - the results of any ongoing or future legal proceedings, including but not limited to intellectual property, product liability or other litigation against us, our third-party manufacturers or other parties on which we rely or litigation against our general industry;
 - any termination or loss of intellectual property rights;
 - any voluntary or regulatory mandated product recalls;
 - adverse developments concerning our manufacturers or suppliers or any future strategic partnerships;
 - introductions and announcements of new technologies by us, any commercialization partners or our competitors, and the timing of these introductions and announcements;
 - successful integration of acquired operations into our ongoing business;
 - announcements of regulatory approval or disapproval of our products and any future enhancements to our products;
 - adverse results from or delays in clinical studies of our products;
 - variations in our financial results or those of companies that are perceived to be similar to us;
 - success or failure of competitive products or therapies in the markets in which we do business;
 - changes in the structure of healthcare payment of our products;
 - announcements by us or our competitors of significant acquisitions, licenses, strategic partnerships, joint ventures or capital commitments;
 - economic and market conditions in general and in the medical technology industry, specifically, including the size and growth, if any, of the market, and issuance of securities analysts’ reports or recommendations;
 - rumors and market speculation involving us or other companies in our industry;
 - sales of substantial amounts of our stock by directors, officers or significant stockholders, or the expectation that such sales might occur;
 - additions or departures of key personnel;
 - changes in our capital structure, such as future issuances of securities and the incurrence of additional debt;
 - the continued impact of the novel coronavirus (COVID-19) pandemic, and the related responses of the government and consumers on our business, financial condition and results of operations; and
 - reduction or interruption in our supply chain.
-

The forward-looking statements included herein are based on current expectations of our management based on available information and involve a number of risks and uncertainties, all of which are difficult or impossible to predict accurately and many of which are beyond our control. As such, our actual results may differ significantly from those expressed in any forward-looking statements. Factors that may cause or contribute to such differences include, but are not limited to, those discussed in more detail in Item 2 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of Part I and Item 1A “Risk Factors” of Part II of this Quarterly Report on Form 10-Q. Readers should carefully review these risks, as well as the additional risks described in other documents we file from time to time with the Securities and Exchange Commission (SEC). In light of the significant risks and uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by us or any other person that such results will be achieved, and readers are cautioned not to place undue reliance on such forward-looking statements. Except as required by law, we undertake no obligation to revise the forward-looking statements contained herein to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. You should read this Quarterly Report on Form 10-Q and the documents we file with the SEC, with the understanding that our actual future results, levels of activity, performance and achievements may be materially different from what we expect. We qualify all of our forward-looking statements by these cautionary statements.

Unless the context indicates otherwise, as used in this Quarterly Report on Form 10-Q, the terms “Axonics,” “our company,” “we,” “us” and “our” refer to Axonics, Inc. and our consolidated subsidiaries.

This Quarterly Report on Form 10-Q includes our trademarks and trade names, including, without limitation, r-SNM®, Axonics SNM System® and Bulkamid®, which are our property and are protected under applicable intellectual property laws. This Quarterly Report on Form 10-Q also includes trademarks and trade names that are the property of other organizations. Solely for convenience, trademarks and trade names referred to in this Quarterly Report on Form 10-Q appear without the ® and ™ symbols, but those references are not intended to indicate that we will not assert, to the fullest extent under applicable law, our rights, or that the applicable owner will not assert its rights, to these trademarks and trade names. We do not intend our use or display of other companies’ trade names or trademarks to imply a relationship with, or endorsement or sponsorship of us by, any other companies.

AXONICS, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Nature of Operations and Summary of Significant Accounting Policies***Nature of Operations***

Axonics, Inc. (the Company) was incorporated in the state of Delaware on March 2, 2012 under the name American Restorative Medicine, Inc. In August 2013, the Company changed its name to Axonics Modulation Technologies, Inc. In March 2021, the Company changed its name to Axonics, Inc. The Company had no operations until October 1, 2013, when the license agreement between Alfred E. Mann Foundation for Scientific Research (AMF) and the Company (the License Agreement) was entered into. The Company is a medical technology company that develops and commercializes innovative and minimally invasive products to treat bladder and bowel dysfunction. The Company has designed and developed the rechargeable sacral neuromodulation (SNM) system (r-SNM System), which delivers mild electrical pulses to the targeted sacral nerve in order to restore normal communication to and from the brain to reduce the symptoms of overactive bladder (OAB), urinary retention (UR) and fecal incontinence (FI). The r-SNM System is protected by intellectual property based on Company-generated innovations and patents and other intellectual property licensed from AMF. The Company has marketing approvals in the United States, Europe, Canada, and Australia for all relevant clinical indications. The premarket approval (PMA) application for the r-SNM System for the treatment of FI was approved by the U.S. Food and Drug Administration (FDA) on September 6, 2019, and the PMA application for the r-SNM System for the treatment of OAB and UR was approved by the FDA on November 13, 2019. Accordingly, the Company began U.S. commercialization of its r-SNM System in the fourth quarter of 2019. Prior to the fourth quarter of 2019, the Company derived revenue only from its international operations in select markets including England, the Netherlands and Canada, and its activities had consisted primarily of developing the r-SNM System, conducting its RELAX-OAB post-market clinical follow-up study in Europe, its ARTISAN-SNM pivotal clinical study in the United States and hiring and training its U.S. commercial team in preparation for the launch of the r-SNM System in the United States. Beginning in February 2021 with the acquisition of Contura Limited, the Company also markets Bulkamid, a urethral bulking agent to treat female stress urinary incontinence (SUI). For more information, see Note 8.

May 2021 Follow-On Offering

On May 14, 2021, the Company completed a follow-on offering by issuing 4,025,000 shares of common stock, at an offering price of \$50.00 per share, inclusive of 525,000 shares of the Company's common stock issued upon the exercise by the underwriters of their option to purchase additional shares. The net proceeds to the Company were approximately \$190.0 million, after deducting underwriting discounts, commissions and offering expenses payable by the Company.

Principles of Consolidation

The accompanying unaudited interim condensed consolidated financial statements include the accounts of the Company; its wholly-owned subsidiaries, Axonics Europe, S.A.S., Axonics Modulation Technologies U.K. Limited, Axonics Modulation Technologies Australia Pty Ltd, Axonics Women's Health Limited, Bulkamid SARL, Axonics GmbH, and Contura, Inc. Intercompany accounts and transactions have been eliminated in consolidation.

Basis of Presentation and Liquidity***Interim Financial Statements***

The interim condensed consolidated financial statements and related footnote disclosures as of and for the three months ended March 31, 2022 are unaudited, and are not necessarily indicative of the Company's operating results for a full year. The unaudited interim condensed consolidated financial statements include all normal and recurring adjustments necessary for a fair presentation of the Company's financial results for the three months ended March 31, 2022 in accordance with United States (U.S.) generally accepted accounting principles (GAAP), however, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the U.S. Securities and Exchange Commission (SEC) rules and regulations relating to interim financial statements. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated

financial statements and notes thereto included within the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2021 (filed with the SEC on March 1, 2022).

Liquidity

The Company only began full-scale commercialization of the r-SNM System in late 2019. The Company has expended significant resources on research and development activities, growing its operations organization and building and training its sales organization.

The Company incurred net losses of \$22.7 million and \$22.5 million for the three months ended March 31, 2022 and 2021, respectively, and had an accumulated deficit of \$337.2 million as of March 31, 2022 compared to \$314.6 million at December 31, 2021. The Company expects to continue to spend a significant amount of its existing resources on sales and marketing activities as the Company continues to commercialize and market its products in the United States and internationally.

As of March 31, 2022, the Company had cash and cash equivalents of \$213.2 million compared to \$220.9 million at December 31, 2021. The Company expects that its cash and cash equivalents on hand will be sufficient to fund its operations through at least the next 12 months. The Company funds its operations through a combination of proceeds from public offerings of its common stock and cash receipts from sales of its products. As of March 31, 2022, the Company had no outstanding borrowings.

The Company may need to raise additional financing in the future to facilitate its business operations. If the Company raises additional funds by issuing equity securities, its stockholders could experience dilution. Debt financing, if available, may involve covenants further restricting its operations or its ability to incur additional debt. Any debt financing or additional equity that the Company raises may contain terms that are not favorable to the Company or its stockholders. Additional financing may not be available at all, or in amounts or on terms acceptable to the Company. If the Company is unable to obtain additional financing when needed to satisfy its liquidity requirements, the Company may be required to scale back its operations.

COVID-19

The recent COVID-19 outbreak, and the resulting restrictions intended to slow the spread of COVID-19, including stay-at-home orders, business shutdowns and other restrictions, has adversely affected the Company's business in several ways. The primary impact on the Company's business was the cancellation or delay of elective procedures in certain areas to allow health care facilities to prioritize the treatment of COVID-19 patients during the initial stages and resurgence periods of the pandemic or because patients are avoiding health care facilities that they feel are unsafe. These developments materially reduced the number of procedures using the Company's r-SNM System. If governmental authorities recommend again in the future that it is deemed advisable for health care facilities to not perform outpatient elective procedures, as was the case at various times since the second quarter of 2020, the Company expects it would materially harm the Company's revenues and potentially increase the Company's operating loss. Even as efforts to contain the pandemic have made progress and some restrictions have relaxed, new variants of the virus may continue to cause additional outbreaks. These challenges will likely continue for the duration of the pandemic and could reduce our revenue and negatively impact our business, financial condition and results of operations while the pandemic continues. If these delays in procedures occur in the future, the Company may have to scale back its business, including reducing headcount, which could have a negative impact on the Company's long-term operations. The Company could also experience other negative impacts of the COVID-19 outbreak such as the lack of availability of the Company's key personnel, temporary closures of the Company's office or the facilities of the Company's business partners, customers, third party service providers or other vendors, and the interruption of the Company's supply chain, distribution channels, liquidity and capital or financial markets.

Any disruption and volatility in the global capital markets as a result of the pandemic may increase the Company's cost of capital and adversely affect the Company's ability to access financing when and on terms that the Company desires. In addition, a recession resulting from the spread of COVID-19 could materially affect the Company's business, especially if a recession results in higher unemployment causing potential patients to not have access to health insurance.

The ultimate extent to which the COVID-19 pandemic and its repercussions impact the Company's business will depend on future developments, which are highly uncertain. However, the foregoing and other continued disruptions to the Company's business as a result of COVID-19 could result in a material adverse effect on the Company's business, results of operations, financial condition and cash flows.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with GAAP requires the Company's management to make estimates and judgments that affect the reported amounts of assets, liabilities, and expenses, and related disclosure of contingent assets and liabilities. The Company bases its estimates on historical experience and on various other assumptions that it believes to be reasonable under the circumstances. The results of this evaluation then form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates, and such differences may be material to the consolidated financial statements. Significant items subject to such estimates and assumptions include the useful lives of property and equipment and intangible assets, the valuation of deferred income tax assets and liabilities, the valuation of contingent consideration liability, the valuation of stock-based compensation, the product returns reserve, the inventory obsolescence reserve and accounts receivable allowance for credit losses.

Revenue Recognition

Revenue recognized during the three months ended March 31, 2022 and 2021 relates entirely to the sale of the Company's products to its customers and distributors.

The Company has revenue arrangements that consist of a single performance obligation. The Company recognizes revenue at the point in time when it transfers control of promised goods to its customers. Revenue is measured as the amount of consideration it expects to receive in exchange for transferring goods. The amount of revenue that is recognized is based on the transaction price, which represents the invoiced amount and includes estimates of variable consideration such as discounts, where applicable. The Company also sells to distributors and applies the same policies as its revenue arrangements with customers, specifically that revenue is recognized at the point in time when it transfers control of promised goods to its distributors. The Company does not offer rights of return or price protection. The amount of variable consideration included in the transaction price may be constrained and is included only to the extent that it is probable that a significant reversal in the amount of the cumulative revenue recognized under the contract will not occur in a future period. Payment terms, typically less than three months, do not include a significant financing component. The Company extends credit to its customers and distributors based upon an evaluation of their financial condition and credit history and generally requires no collateral. The Company does not have any contract balances related to product sales. The Company also does not have significant contract acquisition costs related to product sales.

In accordance with Company policy and based on the Company's historical experience, the allowance for product returns was \$0.1 million and \$0.2 million at March 31, 2022 and December 31, 2021, respectively, and is recorded as a reduction of gross revenue in its condensed consolidated statements of comprehensive loss. Damaged or defective products are replaced at no charge under the Company's standard warranty. For the three months ended March 31, 2022 and 2021, the replacement costs were \$0.1 million and \$0.1 million, respectively, and are recorded within the sales and marketing expenses in its condensed consolidated statements of comprehensive loss.

The Company offers its standard warranty to all customers. The Company does not sell any warranties on a standalone basis. The Company's warranty provides that its products are free of material defects and conform to specifications, and includes an offer to repair, replace or refund the purchase price of defective products. This assurance does not constitute a service and is not considered a separate performance obligation. The Company estimates warranty liabilities at the time of revenue recognition and records it as a charge to sales and marketing expense. The warranty liability as of March 31, 2022 and December 31, 2021 were \$0.1 million and \$0.1 million, respectively.

Shipping and handling costs incurred for the delivery of goods to customers and distributors are included in cost of goods sold. Amounts billed to customers and distributors for shipping and handling are included in net revenue.

The following table provides additional information pertaining to net revenue disaggregated by product and geographic market for the three months ended March 31, 2022 and 2021 (in thousands):

	Three Months Ended March 31,	
	2022	2021
SNM net revenue		
United States	\$ 37,715	\$ 31,745
International markets	1,355	1,158
	<u>\$ 39,070</u>	<u>\$ 32,903</u>
Bulkamid net revenue⁽¹⁾		
United States	\$ 6,569	\$ 578
International markets	2,781	892
	<u>\$ 9,350</u>	<u>\$ 1,470</u>
Total net revenue	<u><u>\$ 48,420</u></u>	<u><u>\$ 34,373</u></u>

(1) The acquisition of Bulkamid was completed on February 25, 2021. Reported revenue includes sales from February 26, 2021 onwards.

Allowance for Credit Losses

The Company makes estimates of the collectability of accounts receivable in accordance with Accounting Standards Update (ASU) 2016-13. The Company's estimate of future credit losses is made by management based upon historical bad debts, customer receivable balances, age of customer receivable balances, customers' financial conditions and reasonable forecasted economic trends. Despite the Company's efforts to minimize credit risk exposure, customers could be adversely affected if future economic and industry trends, including those related to COVID-19, change in such a manner as to negatively impact their cash flows. The full effects of COVID-19 on the Company's customers are highly uncertain and cannot be predicted. As a result, the Company's future collection experience can differ significantly from historical collection trends. If the Company's customers experience a negative impact on their cash flows, it could have a material adverse effect on the Company's results of operations and financial condition.

The following table summarizes the changes in our allowance for credit losses (in thousands):

	Three Months Ended March 31,	
	2022	2021
Balance at beginning of period	\$ 355	\$ 465
Write-offs	—	12
Bad debt recoveries	(39)	(65)
Balance at end of period	<u>\$ 316</u>	<u>\$ 412</u>

Cash and Cash Equivalents

Cash equivalents consist of short-term, highly liquid investments purchased with an original maturity of three months or less. Financial instruments that potentially subject the Company to a concentration of credit risk consist of cash and cash equivalents. At times, the cash and cash equivalent balances may exceed federally insured limits. The Company does not believe that this results in any significant credit risk as the Company's policy is to place its cash and cash equivalents in highly-rated financial institutions. The Company also holds cash in foreign banks that are not federally insured. The Company has not experienced any losses on its deposits of cash and cash equivalents.

Fair Value of Financial Instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A three-level fair value hierarchy prioritizes the inputs used to measure fair value. The hierarchy requires entities to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

- Level 1: Inputs are unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs are quoted prices for similar assets and liabilities in active markets or quoted prices for identical or similar instruments in markets that are not active and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3: Inputs are unobservable inputs based on the Company's assumptions and valuation techniques used to measure assets and liabilities at fair value. The inputs require significant management judgment or estimation.

The Company's assessment of the significance of an input to the fair value measurement requires judgment, which may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels. The carrying amounts reported in the condensed consolidated financial statements approximate the fair value for cash and cash equivalents, accounts receivable, accounts payables, and accrued expenses due to their short-term nature. The carrying amount of the Company's term loan, which is described below, approximates fair value, considering the interest rates are based on the prime interest rate.

The purchase price of business acquisitions is primarily allocated to the tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values on the acquisition date, with the excess recorded as goodwill.

Contingent consideration represents contingent milestone, performance and revenue-sharing payment obligations related to acquisitions and is measured at fair value, based on significant inputs not observable in the market, which represents a Level 3 measurement within the fair value hierarchy. The valuation of contingent consideration is estimated using a binary option-based approach with assumptions the Company believes would be made by a market participant. Significant inputs include projected revenues, discount rates, volatility factors and risk-free rates. The Company assesses these assumptions on an ongoing basis as additional data impacting the assumptions is obtained and any change in fair value of the contingent consideration is recorded within the general and administrative expenses in the consolidated statements of comprehensive loss. Significant increases or decreases in any of those inputs in isolation would result in a significantly lower or higher fair value measurement. Generally, a change in the assumption used for the projected revenues would result in a directionally similar change to the overall estimate of the contingent consideration. The fair value of contingent consideration of \$10.4 million at

March 31, 2022 is reflected in other long-term liabilities in the Company's condensed consolidated balance sheets.

The following table summarizes the changes in the fair value of recurring Level 3 fair value measurements during the three months ended March 31, 2022 and 2021 (in thousands):

	Three Months Ended March 31,	
	2022	2021
Liabilities		
Contingent consideration:		
Balance at beginning of period	\$ 10,370	\$ —
February 25, 2021 Acquisition	—	6,750
Balance at end of period	<u>\$ 10,370</u>	<u>\$ 6,750</u>

There were no transfers between Levels 1, 2 or 3 for the periods presented.

Investment Securities

Those investments in debt securities with maturities less than 12 months at the date of purchase are considered short-term investments. Those investments in debt securities with maturities greater than 12 months at the date of purchase are considered long-term investments. The Company's investment securities classified as available-for-sale are recorded at fair value based on the fair value hierarchy (Level 1 and Level 2 inputs in the fair value hierarchy), and consists primarily of commercial paper, corporate notes and U.S. government and agency securities. Unrealized gains or losses, deemed temporary in nature, are reported as other comprehensive income within the condensed consolidated statements of comprehensive loss. There were no unrealized gains or losses during the three months ended March 31, 2022 and 2021.

A decline in the fair value of any security below cost that is deemed other than temporary results in a charge to net income (loss) and the corresponding establishment of a new cost basis for the security. Premiums (discounts) are amortized (accrued) over the life of the related security as an adjustment to yield using the straight-line interest method. Dividend and interest income are recognized when earned. Realized gains or losses are included in net loss and are derived using the specific identification method for determining the cost of securities sold.

The Company had no outstanding investment securities as of March 31, 2022 and December 31, 2021.

Foreign Currency Translation

The functional currencies of the Company's subsidiaries are currencies other than the U.S. dollar. The Company translates assets and liabilities of the foreign subsidiaries into U.S. dollars at the exchange rate in effect on the balance sheet date. Revenue and expenses of the subsidiaries are translated into U.S. dollars at the average exchange rate during the period. Gains or losses from these translation adjustments are reported as a separate component of stockholders' equity in accumulated other comprehensive gain or loss until there is a sale or complete or substantially complete liquidation of the Company's investment in the foreign subsidiary at which time the gains or losses will be realized and included in net income (loss). As of March 31, 2022 and December 31, 2021, all foreign currency translation gains (losses) have been unrealized and included in accumulated other comprehensive loss. Accumulated other comprehensive loss consists entirely of losses or gains from translation of foreign subsidiaries at March 31, 2022 and December 31, 2021.

Inventory, Net

Inventories are stated at the lower of cost or net realizable value, with cost computed on a first-in, first-out basis. The Company reduces the carrying value of inventories for items that are potentially excess, obsolete, or slow-moving based on changes in customer demand, technology developments, or other economic factors.

The Company capitalizes inventory produced for commercial sale. The Company capitalizes manufacturing costs as inventory following both the receipt of regulatory approval from regulatory bodies and the Company's

intent to commercialize. Costs associated with developmental products prior to satisfying the Company's inventory capitalization criteria are charged to research and development expenses as incurred.

Products that have been approved by certain regulatory authorities may also be used in clinical programs to assess the safety and efficacy of the products for usage that have not been approved by the FDA or other regulatory authorities. The form of product utilized for both commercial and certain clinical programs that are identical are included as inventory with an "alternative future use" as defined in authoritative guidance. Component materials and purchased products associated with clinical development programs are included in inventory and charged to research and development expenses when the product enters the research and development process and no longer can be used for commercial purposes and, therefore, does not have an "alternative future use."

For products that are under development and have not yet been approved by regulatory authorities, purchased component materials are charged to research and development expenses when the inventory ownership transfers to the Company.

The Company analyzes inventory levels to identify inventory that may expire prior to sale, inventory that has a cost basis in excess of its net realizable value, or inventory in excess of expected sales requirements. Although the manufacturing of the r-SNM System is subject to strict quality control, certain batches or units of product may no longer meet quality specifications or may expire, which would require adjustments to the Company's inventory values. The Company also applies judgment related to the results of quality tests that are performed throughout the production process, as well as the understanding of regulatory guidelines, to determine if it is probable that inventory will be saleable. These quality tests are performed throughout the pre- and post-production processes, and the Company continually gathers information regarding product quality for periods after the manufacturing date. The Company's products currently have a maximum estimated shelf life range of 12 to 36 months and, based on sales forecasts, the Company expects to realize the carrying value of the product inventory. In the future, reduced demand, quality issues, or excess supply beyond those anticipated by management may result in a material adjustment to inventory levels, which would be recorded as an increase to cost of sales.

The determination of whether inventory costs will be realizable or not requires estimates by the Company's management. A critical input in this determination is future expected inventory requirements based on internal sales forecasts. Management then compares these requirements to the expiry dates of inventory on hand. To the extent that inventory is expected to expire prior to being sold, management will write down the value of inventory.

As of March 31, 2022, the Company had \$44.3 million, \$3.0 million and \$14.6 million of finished goods inventory, work-in-process inventory and raw materials inventory, respectively, net of reserves of \$0.1 million. As of December 31, 2021, the Company had \$46.8 million, \$2.8 million and \$15.3 million of finished goods inventory, work-in-process inventory and raw materials inventory, respectively, net of reserves of \$0.2 million.

Customer and Vendor Concentration

As of March 31, 2022 and December 31, 2021, there were no customers who accounted for over 10% of the Company's consolidated accounts receivable. As of March 31, 2022 and December 31, 2021, there were two vendors and no vendor, respectively, who accounted for over 10% of the Company's consolidated accounts payable. As of March 31, 2022 and December 31, 2021, there were no customers who accounted for over 10% of the Company's consolidated net revenue. As of March 31, 2022 and December 31, 2021, there were three vendors and one vendor, respectively, who accounted for over 10% of the Company's inventory-related purchases.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally between three and seven years. Leasehold improvements are amortized over the lesser of the life of the lease or the useful life of the improvements. Maintenance and repairs are charged to expense as incurred. When assets are retired or otherwise disposed of, the cost and accumulated depreciation are removed from the balance sheet and any resulting gain or loss is reflected in operations.

Goodwill

Goodwill represents the excess purchase price over the fair values of the identifiable assets acquired less the liabilities assumed. Goodwill is tested for impairment at the reporting unit level by comparing the reporting unit's carrying amount to the fair value of the reporting unit. The fair values are estimated using an income and discounted cash flow approach. The Company evaluates its goodwill on an annual basis in the fourth quarter or more frequently if it believes indicators of impairment exist. The Company assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount or performs an annual impairment test. When tested quantitatively, the Company compares the fair value of the applicable reporting unit with its carrying value. In making this assessment, management relies on a number of factors, including expected future operating results, business plans, economic projections, anticipated future cash flows, business trends and declines in the Company's market capitalization. The Company estimates the fair values of its reporting unit using a combination of the discounted cash flow and income approaches. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the amount by which the carrying value exceeds the fair value is recognized as an impairment loss. During the three months ended March 31, 2022, the Company did not record any impairment charges related to goodwill.

Intangible Assets**Patent license asset**

The intangible asset represents exclusive rights to an additional field-of-use on the patent suite within the License Agreement with AMF. The additional field-of-use was provided in exchange for 50,000 shares of Series A preferred stock, the fair value of which was \$1.0 million in 2013. The intangible asset was recorded at its fair value of \$1.0 million at the date contributed. In connection with the initial public offering, such shares of Series A preferred stock were converted into common stock. Amortization of this asset is recorded over the shorter of the patent or legal life on a straight-line basis. The weighted-average amortization period is 8.71 years. The Company recorded minimal expenses for the amortization of the patent license asset during the three months ended March 31, 2022 and 2021. The Company will review the intangible asset for impairment whenever an impairment indicator exists. There have been no intangible asset impairment charges to date. For additional information, see Note 8.

Exclusive license asset

The intangible asset represents exclusive rights of existing technologies and development services from MST entered into on March 2, 2021. The agreement was provided in exchange for 65,594 shares of common stock, \$0.0001 par value, the fair value of which was \$3.6 million upon transfer. The intangible asset was recorded at its fair value of \$3.3 million at the date of the agreement, with the difference of \$0.3 million recorded as a vendor credit in accounts payable in the condensed consolidated balance sheets. Amortization of this asset is recorded over the four-year term of the agreement on a straight-line basis. The Company recorded expense for the amortization of the exclusive license asset of \$0.2 million during the three months ended March 31, 2022. There was no amortization of this intangible asset recorded during the three months ended March 31, 2021. The Company will review the intangible asset for impairment whenever an impairment indicator exists. There have been no intangible asset impairment charges to date. For additional information, see Note 8.

Contura acquisition

The intangible assets represent technology, trade names and trademarks, and customer relationships acquired from Contura on February 25, 2021. The straight-line method over the period of estimated benefit is used to amortize finite-lived intangible assets except for customer relationships. Accounting Standards Codification (ASC) 350-30-35-3 states that customer relationships generally dissipate at a more rapid rate in the earlier periods following a company's succession to these relationships, with the rate of attrition declining over time. As such, the accelerated method is used to amortize customer relationships. The Company recorded expense for the amortization of Contura acquisition intangible assets of \$2.2 million and \$0.6 million during the three months ended March 31, 2022 and 2021, respectively. For additional information, see Note 8.

Impairment of Long-Lived Assets

The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability is measured by comparing the carrying amount to the future net cash flows that the assets are expected to generate. If said assets are considered to be impaired, the impairment that would be recognized is measured by the amount by which the carrying amount of the assets exceeds the projected discounted future net cash flows arising from the asset. There have been minimal impairments of long-lived assets to date.

Leases

In accordance with ASU No. 2016-02, “Leases (Topic 842)”, components of a lease should be split into three categories: lease components, non-lease components, and non-components. The fixed and in-substance fixed contract consideration (including any consideration related to non-components) must be allocated based on the respective relative fair values to the lease components and non-lease components. Entities may elect not to separate lease and non-lease components. Rather, entities would account for each lease component and related non-lease component together as a single lease component. The Company has elected to account for lease and non-lease components together as a single lease component for all underlying assets and allocate all of the contract consideration to the lease component only. Topic 842 allows for the use of judgment in determining whether the assumed lease term is for a major part of the remaining economic life of the underlying asset and whether the present value of lease payments represents substantially all of the fair value of the underlying asset. The Company applies the bright line thresholds referenced in Topic 842 to assist in evaluating leases for appropriate classification between operating and finance leases. The aforementioned bright lines are applied consistently to the Company’s entire portfolio of leases.

Operating lease ROU asset and operating lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at commencement date. As the Company’s leases do not provide an implicit rate, the Company uses its incremental borrowing rate, which is the rate for a fully collateralized amortizing loan with the same maturity as the lease term, based on the information available at commencement date in determining the present value of future payments. The operating lease ROU asset also includes any lease payments made and excludes lease incentives and initial direct costs incurred. The lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option. Lease expense for minimum lease payments is recognized on a straight-line basis over the lease term.

Research and Development

Research and development costs are charged to operations as incurred. Research and development costs include salary and personnel-related costs, costs of clinical studies and testing, supplies and materials, and outside consultant costs.

Advertising Expense

The Company expenses advertising costs as they are incurred. During the three months ended March 31, 2022 and 2021, advertising expense totaled \$3.2 million and \$1.4 million, respectively, and are recorded within the sales and marketing expenses in its condensed consolidated statements of comprehensive loss.

Income Taxes

The Company accounts for income taxes using the asset and liability method to compute the difference between the tax basis of assets and liabilities and the related financial amounts, using currently enacted tax rates. The Company has net deferred tax assets in certain jurisdictions. The realization of these deferred tax assets is dependent upon the Company’s ability to generate sufficient taxable income in future years. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount that more likely than not will be realized. The Company evaluates the recoverability of the deferred tax assets annually, and maintains a full valuation allowance on its U.S. net deferred tax assets. The Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by taxing authorities, based on the technical merits of the position. The Company is subject to transfer pricing and other tax regulations designed to ensure that appropriate levels of income are reported as earned by the Company’s U.S. and foreign entities and are taxed accordingly. In the normal course of business, the Company is audited by federal, state

and foreign tax authorities, and subject to inquiries from those tax authorities regarding the amount of taxes due. These inquiries may relate to the timing and amount of deductions and the allocation of income among various tax jurisdictions. The Company's policy is to recognize interest and penalties related to unrecognized tax benefits, if any, in income tax expense.

Stock-Based Compensation

The Company measures the cost of employee and non-employee services in exchange for an award of equity instruments based on the grant-date fair value of the award and recognizes compensation cost over the requisite service period (typically the vesting period), generally three or four years. Forfeitures are estimated at the time of the grant and revised in subsequent periods to reflect differences between the estimates and the number of shares that actually become exercisable.

The Company uses the Black-Scholes option pricing model to determine the fair value of stock options (as of the date of grant) that have service conditions for vesting. Stock options and restricted shares awards vest based on service conditions, typically over three or four years.

The Company also grants shares of performance-based restricted stock units that typically vest after one year only if the Company has also achieved certain performance objectives as defined and approved by the Company's board of directors. The fair value of performance awards are determined based on the Company's stock price at the date of grant and expensed over the performance period based on the probability of achieving the performance objectives. In addition, the Company also grants market-based restricted stock units that have combined market conditions and service conditions for vesting, for which the Company uses the Monte Carlo valuation model to value equity awards (as of the date of grant).

Net Loss per Share of Common Stock

Basic net loss per share of common stock is calculated by dividing the net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period, without consideration for potentially dilutive securities. Diluted net loss per share is computed by dividing the net loss attributable to common stockholders by the weighted-average number of shares of common stock and potentially dilutive securities outstanding for the period. For purposes of the diluted net loss per share calculation, common stock options, unvested RSAs and RSUs are considered to be potentially dilutive securities. Because the Company has reported a net loss in all periods presented, diluted net loss per share of common stock is the same as basic net loss per share of common stock for those periods.

For the three months ended March 31, 2022 and 2021, there were 2,416,373 and 2,488,284 potentially dilutive weighted-average shares, respectively, that were not included in the computation of diluted weighted-average shares of common stock and common stock equivalent shares outstanding because their effect would have been antidilutive given the Company's net loss.

Segment Reporting

Operating segments are defined as components of an entity for which separate financial information is available and that is regularly reviewed by the Chief Operating Decision Maker (CODM) in deciding how to allocate resources to an individual segment and in assessing performance. The Company's CODM is its Chief Executive Officer. The Company has determined it operates in one segment, the development and commercialization of innovative and minimally invasive products to treat bladder and bowel dysfunction. Geographically, the Company sells over 90% to hospitals in the United States. Segment information is consistent with how management reviews the business, makes investing and resource allocation decisions and assesses operating performance.

Recently Adopted Accounting Pronouncements

In December 2019, the Financial Accounting Standards Board (FASB) issued ASU 2019-12, "Income Taxes—Simplifying the Accounting for Income Taxes," which simplifies the accounting for income taxes by clarifying and amending existing guidance related to the recognition of franchise tax, the evaluation of a step-up in the tax basis of goodwill and the effects of enacted changes in tax laws or rates in the effective tax rate computation, among other clarifications. This guidance is effective for annual periods beginning after December 15, 2020, which

was the Company's first quarter of fiscal year 2021, with early adoption permitted. The adoption of this guidance did not have an impact on the Company's consolidated financial statements or related disclosures.

Recent Accounting Pronouncements

We have reviewed and considered all recent accounting pronouncements that have not yet been adopted and believe there are none that could potentially have a material impact on our business practices, financial condition, results of operations, or disclosures.

Note 2. Property and Equipment

Property and equipment, net consists of the following (in thousands) at:

	March 31, 2022	December 31, 2021
Equipment	\$ 2,611	\$ 2,429
Computer hardware and software	2,595	2,450
Tools and molds	1,626	1,579
Leasehold improvements	4,449	4,372
Furniture and fixtures	1,515	1,502
Construction in progress	198	127
	<u>12,994</u>	<u>12,459</u>
Less: accumulated depreciation and amortization	(6,087)	(5,544)
	<u>\$ 6,907</u>	<u>\$ 6,915</u>

Depreciation and amortization expense of property and equipment was \$0.6 million and \$0.5 million for the three months ended March 31, 2022 and 2021, respectively.

Note 3. Commitments and Contingencies

Operating Leases

In August 2014, the Company entered into a five-year operating lease for approximately 12,215 square feet of office space beginning on November 1, 2014, and expiring on October 31, 2019. In June 2019, the lease was amended to extend the expiration date to October 31, 2020. In September 2020, the lease was amended to extend the expiration date to July 31, 2022, and in December 2021, the lease was amended to extend the expiration date to January 31, 2028. Upon the execution of the amendments, which were deemed to be a lease modification, the Company reassessed the lease liability using the incremental borrowing rate for a collateralized asset of the same remaining term at the modification date and recorded ROU assets for the same amount. The Company also reassessed the lease classification and concluded that the lease continues to be an operating lease. Under the terms of the lease, the Company is responsible for taxes, insurance, and maintenance expense. The lease contains certain scheduled rent increases. Rent expense is recognized on a straight-line basis over the expected lease term.

In November 2017, the Company entered into a seven-year operating lease for approximately 25,548 square feet of office space beginning on August 1, 2018, and expiring on August 31, 2025. In June 2019, the lease was amended to extend the expiration date to October 31, 2027. Upon the execution of the amendments, which were deemed to be a lease modification, the Company reassessed the lease liability using the incremental borrowing rate for a collateralized asset of the same remaining term at the modification date and recorded ROU assets for the same amount. The Company also reassessed the lease classification and concluded that the lease continues to be an operating lease. Under the terms of the lease, the Company is responsible for taxes, insurance, and maintenance expense. The lease contains certain scheduled rent increases. Rent expense is recognized on a straight-line basis over the expected lease term. The Company has a renewal option to extend the term of the lease for a period of five years beyond the initial term. Under the terms of the lease, the base rent payable with respect to each renewal term will be equal to the prevailing market rental rent as of the commencement of the applicable renewal term. In the event of a default of certain of the Company's obligations under the lease, the Company's landlord would have the right to

terminate the lease.

In June 2019, the Company entered into an eight-year operating lease for approximately 32,621 square feet of office space beginning on January 15, 2020 and expiring on January 31, 2028. The Company uses these premises as its new principal executive offices and for general office space. The Company intends to utilize its other currently-leased spaces through the lease expiration dates to conduct the training of its sales team and for manufacturing purposes. Under the terms of the lease, the Company is responsible for taxes, insurance, and maintenance expense. The lease contains certain scheduled rent increases. Rent expense is recognized on a straight-line basis over the expected lease term. The Company has a renewal option to extend the term of the lease for a period of five years beyond the initial term. Under the terms of the lease, the base rent payable with respect to each renewal term will be equal to the prevailing market rental rent as of the commencement of the applicable renewal term. In the event of a default of certain of the Company's obligations under the lease, the Company's landlord would have the right to terminate the lease.

In August 2020, the Company entered into a 38-month operating lease for approximately 5,693 square feet of warehouse space beginning on October 15, 2020 and expiring on December 31, 2023. The Company uses these premises for general warehouse space.

During the three months ended March 31, 2022 and 2021, ROU assets obtained in exchange for new operating lease liabilities were none and \$0.1 million, respectively. As of March 31, 2022 and December 31, 2021, the ROU asset has a balance of \$6.8 million and \$7.1 million, respectively. The operating lease ROU asset is included within the Company's non-current other assets, and lease liabilities are included in current or noncurrent liabilities in the Company's condensed consolidated balance sheets. During the three months ended March 31, 2022 and 2021, cash paid for amounts included in operating lease liabilities was \$0.5 million and \$0.5 million, respectively. Amortization of the ROU asset was \$0.2 million and \$0.3 million for the three months ended March 31, 2022 and 2021, respectively.

As of March 31, 2022 and December 31, 2021, the weighted-average remaining lease term for the Company's operating leases were 5.7 years and 5.9 years, respectively. The weighted-average incremental borrowing rate for a collateralized asset of the same remaining term used to determine the present value of the Company's operating leases' future payments was 7.1% and 7.1% as of March 31, 2022 and December 31, 2021, respectively.

Total lease cost for the three months ended March 31, 2022 and 2021 are as follows (in thousands):

	Three Months Ended March 31,	
	2022	2021
Lease cost		
Operating lease cost	\$ 524	\$ 525
Short-term lease cost	21	23
Variable lease cost	35	47
Total lease cost	\$ 580	\$ 595

License Agreement

In October 2013, the Company entered into the License Agreement, pursuant to which AMF, a Company stockholder, licensed the Company certain patents and know-how (collectively, the AMF IP) relating to, in relevant part, an implantable pulse generator and related system components in development by AMF as of that date, in addition to any peripheral or auxiliary devices, including all components, that when assembled, comprise such device, excluding certain implantable pulse generators (collectively, the AMF Licensed Products). Under the License Agreement, for each calendar year beginning in 2018, the Company is obligated to pay AMF a royalty on an AMF Licensed Product-by-AMF Licensed Product basis if one of the following conditions applies: (i) one or more valid claims within any of the patents licensed to the Company by AMF covers such AMF Licensed Products or the manufacture of such AMF Licensed Products or (ii) for a period of 12 years from the first commercial sale anywhere

in the world of such AMF Licensed Product, in each case. The foregoing royalty is calculated as the greater of (a) 4% of all net revenue derived from the AMF Licensed Products, and (b) the Minimum Royalty, payable quarterly. The Minimum Royalty automatically increases each year after 2018, subject to a maximum amount of \$200,000 per year. The Company generated net SNM revenue of \$39.1 million and \$32.9 million during the three months ended March 31, 2022 and 2021, respectively, and recorded related royalties of \$1.6 million and \$1.3 million during the three months ended March 31, 2022 and 2021, respectively. Royalty expense is included in operating expenses in the condensed consolidated statements of comprehensive loss. Accrued royalty of \$1.6 million and \$1.8 million as of March 31, 2022 and December 31, 2021, respectively, is included within accrued liabilities in the Company's condensed consolidated balance sheets.

Legal Matters

On November 4, 2019, Medtronic, Inc., Medtronic Puerto Rico Operations Co., Medtronic Logistics LLC and Medtronic USA, Inc. (collectively, the Medtronic Affiliates) filed a complaint against the Company in the United States District Court for the Central District of California, Case No. 8:19-cv-2115, and amended the complaint on November 26, 2019. The Company refers to this matter as the Medtronic Litigation. The complaint asserts that the Company's r-SNM System infringes U.S. Patent Nos. 8,036,756, 8,626,314, 9,463,324 and 9,821,112 held by the Medtronic Affiliates, and the amended complaint further includes the additional patents 8,738,148; 8,457,758; and 7,774,069 (collectively, the Medtronic Patents). The Medtronic Litigation requests customary remedies for patent infringement, including (i) a judgment that the Company has infringed and is infringing the Medtronic Patents, (ii) damages, including treble damages for willful infringement, (iii) a permanent injunction preventing the Company from infringing the Medtronic Patents, (iv) attorneys' fees, and (v) costs and expenses. The Company believes the allegations are without merit and is vigorously defending itself against them. Given the early stage of the Medtronic Litigation, the Company is unable to predict the likelihood of success of the claims of the Medtronic Affiliates against the Company or to quantify any risk of loss. The Medtronic Litigation could last for an extended period of time and require the Company to dedicate significant financial resources and management resources to its defense. An adverse ruling against the Company could materially and adversely affect its business, financial position, results of operations or cash flows and could also result in reputational harm. Even if the Company is successful in defending against these claims, the Medtronic Litigation could result in significant costs, delays in future product developments, reputational harm or other collateral consequences.

On March 16, 2020, the Company filed seven petitions before the United States Patent and Trademark Office (USPTO) requesting inter partes review (IPR) to contest the validity of each of the Medtronic patents that Medtronic has alleged are being infringed by the Company. In September 2020, the USPTO decided that it will accept or "institute" the IPR process for six of the seven patents, finding that the Company had demonstrated a reasonable likelihood that at least one, if not all, of the claims of these six patents are invalid. The USPTO issued decisions on the IPR petitions in September 2021. The USPTO invalidated several claims in the Medtronic patents but declined to invalidate the majority of asserted claims. The Company appealed the decisions on the claims that were not invalidated. Following these IPR decisions, the judge presiding over the litigation in the United States District Court for the Central District of California lifted the stay on litigation proceedings. The Company is currently engaged in discovery in the Medtronic Litigation.

In addition to the Medtronic Litigation, the Company is and may continue to be involved in claims, legal proceedings, and investigations arising out of its operations in the normal course of business.

Note 4. Long-Term Debt

In June 2021, the principal amount, accrued interest, accrued loan fees, and prepayment fees related to the term loan under the Loan and Security Agreement with Silicon Valley Bank entered into in February 2021, were paid in full. The unamortized debt issuance costs of \$4.4 million were expensed and recognized as interest expense.

In January 2021, the principal amount, accrued interest, accrued loan fees, and prepayment fees related to the term loan under the Loan and Security Agreement with Silicon Valley Bank entered into in February 2018, were paid in full. The unamortized debt issuance costs of \$0.4 million were expensed and recognized as interest expense.

Note 5. Stock-based Compensation

Stock-based compensation expense included in the Company's unaudited condensed consolidated statements of comprehensive loss is allocated as follows (in thousands):

	Three Months Ended March 31,	
	2022	2021
Research and development	\$ 1,510	\$ 1,329
General and administrative	1,937	1,685
Sales and marketing	3,691	2,289
	<u>\$ 7,138</u>	<u>\$ 5,303</u>

Stock Option Activity

The option awards issued under the 2014 Stock Option Plan (the 2014 Plan) and the 2018 Omnibus Incentive Plan (the 2018 Plan) were measured based on fair value. The Company's fair value calculations were made using the Black-Scholes option pricing model with the following assumptions:

	Three Months Ended March 31,	
	2022	2021
Expected term (in years)	—	5.46 - 6.00
Stock volatility	—	63.49%
Risk-free interest rate	—	0.53% - 1.16%
Dividend rate	—	—

The Company used the simplified method of determining the expected term of stock options as the Company believes this represents the best estimate of the expected term of a new option. The expected stock price volatility assumption was determined by examining the historical volatilities for industry peers, as the Company did not have sufficient trading history for the Company's common stock. The Company will continue to analyze the historical stock price volatility and expected term assumption as more historical data for the Company's common stock becomes available. The risk-free interest rate assumption is based on the U.S. Treasury instruments, whose term was consistent with the expected term of the Company's stock options. The expected dividend assumption is based on the Company's history and expectation of dividend payouts. The assumptions regarding the expected term of the options and the expected volatility of the stock price are subjective, and these assumptions have a significant effect on the estimated fair value amounts. There were no stock option grants for the three months ended March 31, 2022. The weighted-average grant date fair value of options granted was \$32.89 for the three months ended March 31, 2021.

As of March 31, 2022 and December 31, 2021, there was \$5.3 million and \$6.7 million, respectively, of total unrecognized compensation cost related to unvested stock options that is expected to be recognized over a weighted-average period of approximately 1.4 years and 1.6 years, respectively.

The following table summarizes stock option activity for the three months ended March 31, 2022 under the 2014 and 2018 Plans (in thousands, except share and per share data):

	Number of Options	Weighted-Average Exercise Price Per Share	Aggregate Intrinsic Value
Outstanding at December 31, 2021	1,427,892	\$ 18.13	
Options exercised	(91,286)	15.53	\$ 3,486 (1)
Options forfeited	(8,500)	33.88	
Outstanding at March 31, 2022	<u>1,328,106</u>	<u>\$ 18.20</u>	<u>\$ 58,963 (2)</u>

(1) Represents the total difference between the Company's closing stock price at the time of exercise and the stock option exercise price, multiplied by the number of options exercised.

(2) Represents the total difference between the Company's closing stock price on the last trading day of the first quarter of 2022 and the stock option exercise price, multiplied by the number of in-the-money options as of March 31, 2022. The amount of intrinsic value will change based on the fair market value of the Company's stock.

The weighted-average remaining contractual term of options outstanding and exercisable is 6.8 years and 6.9 years at March 31, 2022 and December 31, 2021, respectively.

Restricted Shares Awards Activity

As of March 31, 2022 and December 31, 2021, there was \$52.8 million and \$42.5 million, respectively, of total unrecognized compensation cost related to unvested restricted shares awards that is expected to be recognized over a weighted-average period of approximately 2.8 years and 3.0 years, respectively.

The following table summarizes restricted shares awards activity for the three months ended March 31, 2022:

	Number of Restricted Shares Awards	Weighted-Average Fair Value Per Share at Grant Date
Outstanding at December 31, 2021	1,102,034	\$ 46.07
Restricted shares awards granted	352,204	48.14
Restricted shares awards vested	(169,110)	37.55
Restricted shares awards forfeited	(39,725)	56.85
Outstanding at March 31, 2022	1,245,403	\$ 47.47

Restricted Stock Units Activity

As of March 31, 2022 and December 31, 2021, there was \$5.8 million and \$1.9 million, respectively, of total unrecognized compensation cost related to unvested restricted stock units that is expected to be recognized over a weighted-average period of approximately 1.1 years and 0.9 years, respectively.

The following table summarizes restricted stock units activity for the three months ended March 31, 2022:

	Number of Restricted Stock Units	Weighted-Average Fair Value Per Share at Grant Date
Outstanding at December 31, 2021	250,464	\$ 42.99
Restricted stock units granted	201,884	38.75
Restricted stock units vested	(268,930)	35.88
Outstanding at March 31, 2022	183,418	\$ 48.74

Note 6. Income Taxes

The following table presents details of the provision for income taxes and effective tax rates (in thousands, except percentages):

	Three Months Ended March 31,	
	2022	2021
Income tax benefit	\$(1,111)	\$(555)
Effective tax rate	4.67%	2.41%

The Company accounts for income taxes according to ASC 740. The Company periodically evaluates whether a portion or all of its deferred tax assets will be recovered. The Company records a valuation allowance against deferred tax assets if and to the extent it is more likely than not that they will not be recovered. In evaluating the need for a valuation allowance, the Company weighs all relevant positive and negative evidence, including among other factors, historical financial performance, forecasts of income over the applicable carryforward periods, and the market environment, with each consideration weighted based on its reliability. The Company continues to maintain a full valuation allowance against its otherwise recognizable U.S. net deferred income tax assets as of March 31, 2022 and December 31, 2021.

The effective tax rate differs from the statutory U.S. income tax rate due to differing tax rates imposed on income earned in foreign jurisdictions, losses in foreign jurisdictions, and certain nondeductible expenses. The effective tax rate could change significantly from quarter to quarter because of recurring and nonrecurring factors.

The provision for income taxes for the three months ended March 31, 2022 was primarily the result of losses benefited in certain foreign jurisdictions.

At December 31, 2021, the Company had U.S. federal and foreign net operating loss (NOL) carryforwards of approximately \$258.2 million and \$16.4 million, respectively. U.S. federal NOLs in the amount of \$51.5 million will expire between 2033 and 2037 while the remainder will carryover indefinitely. The foreign net operating loss carryforwards have an indefinite carryforward period. The Company had U.S. state NOLs of \$245.6 million, which will expire between 2033 and 2041.

Pursuant to Sections 382 and 383 of the Internal Revenue Code of 1986, as amended (the Internal Revenue Code), use of the Company's NOL carryforwards may be limited if the Company experiences a cumulative change in ownership of greater than 50% in a rolling three-year period. The Company performed an analysis of changes in ownership for purposes of these Internal Revenue Code sections. Based on the study performed in 2020, the Company determined that an ownership change occurred in 2014, 2018 and 2019. Based on the study performed in 2021, the Company determined that an ownership change did not occur in 2021.

Note 7. Employee Benefit Plan

The Company sponsors a defined contribution retirement savings plan under Section 401(k) of the Internal Revenue Code. This plan covers all employees who meet minimum age and service requirements, and allows participants to defer a portion of their annual compensation on a pre- or post-tax basis. Contributions to the plan by the Company may be made at the discretion of the board of directors. During the three months ended March 31, 2022 and 2021, the Company contributions to the plan amounted to \$0.5 million and \$0.4 million, respectively.

Note 8. Goodwill and Intangible Assets

The change in the carrying amount of goodwill during the three months ended March 31, 2022 included the following (in thousands):

December 31, 2021	\$	105,510
Foreign currency translation adjustment		(2,952)
March 31, 2022	\$	102,558

Intangible assets as of March 31, 2022 included the following (in thousands):

	Weighted-Average Amortization Period	March 31, 2022			Intangible Assets, Net
		Gross Carrying Amount	Accumulated Amortization	Foreign currency translation adjustment	
Patent license asset	8.71 years	\$ 1,000	(947)	—	\$ 53
Exclusive license asset	4 years	\$ 3,300	(880)	—	\$ 2,420
Technology	12 years	\$ 81,100	(7,362)	(3,490)	\$ 70,248
Trade names and trademarks	Indefinite	\$ 19,700	—	(906)	\$ 18,794
Customer relationships	12 years	\$ 11,400	(1,320)	(416)	\$ 9,664
		\$ 116,500	\$ (10,509)	\$ (4,812)	\$ 101,179

Intangible asset as of December 31, 2021 included the following (in thousands):

	Weighted-Average Amortization Period	December 31, 2021			Intangible Asset, Net
		Gross Carrying Amount	Accumulated Amortization	Foreign currency translation adjustment	
Patent license asset	8.71 years	\$ 1,000	(919)	—	\$ 81
Exclusive license asset	4 years	\$ 3,300	(660)	—	2,640
Technology	12 years	\$ 81,100	(5,668)	(1,424)	74,008
Trade names and trademarks	Indefinite	\$ 19,700	—	(365)	19,335
Customer relationships	12 years	\$ 11,400	(799)	(196)	10,405
		\$ 116,500	\$ (8,046)	\$ (1,985)	\$ 106,469

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with our unaudited condensed consolidated financial statements and the related notes to those statements included elsewhere in this Quarterly Report on Form 10-Q, as well as the audited consolidated financial statements and the related notes thereto, and the discussion under “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Business” included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2021, as filed with the SEC on March 1, 2022.

Overview

We are a global medical technology company that is developing and commercializing novel products for adults with bladder and bowel dysfunction, including: (i) implantable rechargeable sacral neuromodulation (SNM) systems to treat urinary urge incontinence (UII) and urinary urgency frequency (UUF), together referred to as overactive bladder (OAB), as well as fecal incontinence (FI), and non-obstructive urinary retention (UR); and (ii) a urethral bulking agent to treat female stress urinary incontinence (SUI).

OAB affects an estimated 87 million adults in the United States and Europe, with an additional 40 million adults estimated to suffer from FI. SUI affects an estimated 29 million women in the United States alone.

SNM therapy is an effective and durable treatment for UUI, UUF, UR and FI that has been widely used and reimbursed in Europe and the United States for the past two decades. Bulkamid is also an effective and durable treatment for SUI. Bulkamid was approved by the FDA for use in the United States in early 2020 and is widely reimbursed in the United States and most international markets.

SNM is the only OAB treatment with proven clinical superiority to standard medical therapy and OAB patients who receive SNM report significantly higher quality of life than patients undergoing drug treatment.

We estimate the U.S. SNM market is now approximately \$750 million and believe it is a growing market. Until we entered the market, it was serviced by Medtronic as a single participant.

We believe our proprietary rechargeable SNM system (r-SNM System), the first to be marketed worldwide, offers significant advantages, and is well positioned to capture market share and grow the market for SNM therapy. Our r-SNM System is designed to last 15 or more years in the human body, is only 5cc in volume, offers broad MRI access, ease of use, intuitive programmers, and the longest interval between recharging among rechargeable SNM systems.

We have marketing approvals in the United States, Europe, Canada, and Australia for all relevant clinical indications and initiated limited commercial efforts in England, the Netherlands and Canada in late 2018 and subsequently in Germany and Switzerland. SNM revenue during the three months ended March 31, 2022 from international operations in the Netherlands, England, Canada, Switzerland, and Germany, was approximately \$1.4 million.

We are primarily focused on commercializing our products in the United States, which accounts for the vast majority of sales worldwide. We have established a significant commercial infrastructure, with approximately 290 sales and clinical support personnel in the United States. We continue to make significant investments to build our commercial organization to market and support our products. When making hiring decisions for these roles, we prioritize individuals with strong sales backgrounds who also have existing relationships with urologists and urogynecologists.

In February 2021, the FDA approved a third-generation INS for our r-SNM System under a PMA supplement. The third-generation INS upgrades the embedded software in the INS and the functionality of the patient remote control. These modifications give patients the ability to make broader stimulation parameter adjustments at home, including selecting a second therapy program that was set post-operatively based on interoperative findings. We intend to continue to make investments in research and development efforts to develop enhancements to our r-SNM System.

On February 25, 2021, we acquired Contura Limited (Contura) and its Bulkamid product, a urethral bulking agent indicated for the treatment of female SUI. In consideration for the acquisition, we paid approximately \$141.3 million in cash and issued 1,096,583 shares of our common stock. We may pay an additional \$35 million in the event Bulkamid sales in any consecutive 12-month period exceed \$50 million before December 31, 2024. As part of the transaction, we entered into a supply agreement with Contura International A/S (Contura International) to manufacture Bulkamid for us (Manufacturing and Supply Agreement). We have a right to a technology transfer after June 30, 2022 that would enable us to insource the manufacturing of Bulkamid. Bulkamid received a CE Mark in 2003 and a PMA from the FDA in 2020 and is sold through a combination of a direct sales force in the United States and certain European countries and distributors in certain international markets. The acquisition of Contura has expanded our international operations.

In March 2022, the FDA approved our newly developed, long-lived, non-rechargeable SNM system. The non-rechargeable INS utilizes a primary cell battery with an expected life of 15 years at typical stimulation parameters and over 20 years at low amplitude parameters. The non-rechargeable INS is approximately 10cc in volume, utilizes constant current stimulation and a recharge-free patient remote control, and is MRI compatible with 1.5T and 3.0T scanners.

Our ability to generate revenue and become profitable will depend on our ability to continue to successfully commercialize our products and any product enhancements we may advance in the future. We expect to derive future revenue by increasing patient and physician awareness of our products. If we are unable to accomplish any of

these objectives, it could have a significant negative impact on our future revenue. If we fail to generate sufficient revenue in the future, our business, results of operations, financial condition, cash flows, and future prospects would be materially and adversely affected.

In the United States, the cost required to treat each patient is reimbursed through various third-party payors, such as commercial payors and government agencies. Most large insurers have established coverage policies in place to cover SNM therapy. Certain commercial payors have a patient-by-patient prior authorization process that must be followed before they will provide reimbursement for SNM therapy. Outside the United States, reimbursement levels vary significantly by country, particularly if that country maintains a single-payor system. SNM therapy is eligible for reimbursement in Canada, Australia, and certain countries in Europe, such as Germany and the United Kingdom. Annual healthcare budgets generally determine the number of SNM systems that will be paid for by the payor in these single-payor system countries.

We currently outsource the manufacture of certain implantable components of our r-SNM System. Our contract manufacturers are all recognized in their field for their competency to manufacture the respective portions of our r-SNM System and have quality systems established that meet FDA requirements. We believe the manufacturers we currently utilize have sufficient capacity to meet our requirements and are able to scale up their capacity relatively quickly with limited capital investment.

Prior to obtaining FDA approval, we devoted substantially all of our resources to research and development activities related to our r-SNM System, including clinical and regulatory initiatives to obtain marketing approvals. We spend a significant amount of our resources on sales and marketing activities to commercialize and market our r-SNM System in the United States.

We incurred net losses of \$22.7 million and \$22.5 million for the three months ended March 31, 2022 and 2021, respectively, and had an accumulated deficit of \$337.2 million as of March 31, 2022 compared to \$314.6 million at December 31, 2021. As of March 31, 2022, we had available cash and cash equivalents of approximately \$213.2 million, current liabilities of approximately \$25.5 million, and long-term liabilities of approximately \$36.6 million.

May 2021 Follow-On Offering

On May 14, 2021, we completed a follow-on offering by issuing 4,025,000 shares of common stock, at an offering price of \$50.00 per share, inclusive of 525,000 shares of our common stock issued upon the exercise by the underwriters of their option to purchase additional shares. The gross proceeds to us from this follow-on offering were \$201.3 million and the net proceeds were approximately \$190.0 million, after deducting underwriting discounts, commissions and offering expenses payable by us.

Impact of COVID-19

The COVID-19 pandemic negatively impacted our sales, starting in the second quarter of 2020, by significantly decreasing and delaying the number of procedures performed using our r-SNM System, and we expect that the pandemic could negatively impact our business, financial condition and results of operations. Similar to the general trend in elective and other surgical procedures, the number of procedures performed using our r-SNM System decreased significantly as healthcare organizations in the United States and globally, including in Europe and Canada, have prioritized the treatment of patients with COVID-19 or have altered their operations to prepare for and respond to the pandemic. Specifically, substantially all of the procedures using our r-SNM System were postponed or cancelled from middle of March 2020 through May 2020, but order flow began a gradual recovery in May 2020 and continued to improve in the second half of 2020 through the second quarter of 2021. During the second half of 2021 and through the first quarter of 2022, certain outpatient elective procedures were again postponed or cancelled related to the COVID-19 pandemic and specifically the Delta and Omicron variants, which adversely affected our business during the second half of 2021 and through the first quarter of 2022.

To protect the health of our employees, their families, and our communities, we have restricted access to our offices to personnel who must perform critical activities that must be completed on-site, limited the number of such personnel that can be present at our facilities at any one time, requested that many of our employees work remotely, and implemented strict travel restrictions. These restrictions and precautionary measures have not adversely affected our operations. Even as efforts to contain the pandemic have made progress and some restrictions

have relaxed, new variants of the virus may continue to cause additional outbreaks. The full extent of COVID-19's effect on our operational and financial performance will depend on future developments, including the duration, spread and intensity of the pandemic, and additional protective measures implemented by the governmental authorities, all of which are uncertain and difficult to predict considering the rapidly evolving landscape. However, if the pandemic continues to evolve into a long-term severe worldwide health crisis, there could be a material adverse effect on our business, results of operations, financial condition, and cash flows.

AMF License Agreement

On October 1, 2013, we entered into a license agreement (the License Agreement) with the Alfred E. Mann Foundation for Scientific Research (AMF), pursuant to which AMF licensed us certain patents and know-how (AMF IP), relating to, in relevant part, an implantable pulse generator and related system components in development by AMF as of that date, in addition to any peripheral or auxiliary devices, including all components, that when assembled, comprise such device, excluding certain implantable pulse generators (AMF Licensed Products).

Under the License Agreement, for each calendar year beginning in 2018, we are obligated to pay AMF a royalty on an AMF Licensed Product-by-AMF Licensed Product basis if one of the following conditions applies: (i) one or more valid claims within any of the patents licensed to us by AMF covers such AMF Licensed Products or the manufacture of such AMF Licensed Products or (ii) for a period of 12 years from the first commercial sale anywhere in the world of such AMF Licensed Product, in each case. The foregoing royalty is calculated as the greater of (a) 4% of all net revenue derived from the AMF Licensed Products, and (b) a minimum annual royalty (the Minimum Royalty), payable quarterly. The Minimum Royalty automatically increases each year, subject to a maximum amount of \$200,000 per year. During the three months ended March 31, 2022 and 2021, we have recorded royalties of \$1.6 million and \$1.3 million, respectively. We have 60 days to pay AMF the royalty amount due under the License Agreement, and if we fail to pay AMF within such 60-day period, AMF may, at its election, convert the exclusive license to a non-exclusive license or terminate the License Agreement.

Components of Our Results of Operations

Net Revenue

Revenue during the three months ended March 31, 2022 and 2021 are as follows (in thousands):

	Three Months Ended March 31,	
	2022	2021
SNM net revenue		
United States	\$ 37,715	\$ 31,745
International markets	1,355	1,158
	\$ 39,070	\$ 32,903
Bulkamid net revenue⁽¹⁾		
United States	\$ 6,569	\$ 578
International markets	2,781	892
	\$ 9,350	\$ 1,470
Total net revenue	\$ 48,420	\$ 34,373

(1) The acquisition of Bulkamid was completed on February 25, 2021. Reported revenue includes sales from February 26, 2021 onwards.

Cost of Goods Sold and Gross Margin

Cost of goods sold consists primarily of costs of the components of our r-SNM System, third-party contract labor costs, overhead costs, Bulkamid product costs, as well as distribution-related expenses such as logistics and

shipping costs. The overhead costs include the cost of material procurement and operations supervision and management personnel. We expect overhead costs as a percentage of revenue to decrease as our sales volume increases. Cost of goods sold also include other expenses such as scrap and inventory obsolescence. We expect cost of goods sold to increase in absolute dollars primarily as, and to the extent, our revenue grows. We expect gross margin to vary based on manufacturing costs, regional differences in pricing, and discounts negotiated by customers.

We calculate gross margin as gross profit divided by revenue. We expect future gross margin will be affected by a variety of factors, including manufacturing costs, the average selling price of our products, the implementation of cost-reduction strategies, inventory obsolescence costs, which may occur when new generations of our r-SNM System are introduced, and to a lesser extent, the sales mix between the United States, Canada, Europe and Australia as our average selling price in the United States is expected to be higher than in Canada, Europe and Australia and foreign currency exchange rates. Our gross margin may increase over the long term to the extent our production volumes increase and we receive discounts on the costs charged by our contract manufacturers, thereby reducing our per unit costs. Additionally, our gross margin may fluctuate from quarter to quarter due to seasonality.

Research and Development Expenses

Research and development expenses consist primarily of employee compensation, including stock-based compensation, product development, including testing and engineering, royalty expense, and clinical studies to develop and support our r-SNM System, including clinical study and registry management and monitoring, payments to clinical investigators, and data management. Other research and development expenses include consulting and advisory fees, royalty expense, travel expenses, and equipment-related expenses and other miscellaneous office and facilities expenses related to research and development programs. Research and development costs are expensed as incurred. We expect to continue incurring research and development expenses in the future as we develop next generation versions of our r-SNM System and expand to new markets. We expect research and development expenses as a percentage of revenue to vary over time depending on the level and timing of initiating new product development efforts and new clinical development activities.

The following table summarizes our research and development expenses by functional area for the three months ended March 31, 2022 and 2021 (in thousands):

	Three Months Ended March 31,	
	2022	2021
Personnel related	\$ 5,137	\$ 4,878
Clinical development	268	104
Contract R&D and manufacturing	3,956	2,833
Royalty expense	1,555	1,308
Other R&D expenses	320	246
Total R&D expenses	<u>\$ 11,236</u>	<u>\$ 9,369</u>

General and Administrative Expenses

General and administrative expenses consist primarily of employee compensation, including stock-based compensation, and spending related to finance, information technology, human resource functions, consulting, legal, and professional service fees. Other general and administrative expenses include director and officer insurance premiums, investor relations costs, changes in fair value of the contingent consideration, office-related expenses, facilities and equipment rentals, bad debt expense, and travel expenses. We expect our general and administrative expenses will significantly increase in absolute dollars as we increase our headcount and expand administrative personnel to support our growth and operations as a public company including finance personnel and information technology services. Additionally, we anticipate increased legal expenses associated with our patent infringement litigation with Medtronic. We expect general and administrative expenses to decrease as a percentage of revenue primarily as, and to the extent, our revenue grows.

Sales and Marketing Expenses

Sales and marketing expenses consist primarily of employee compensation, including sales personnel commissions and stock-based compensation, trade shows, booth exhibition costs, and the related travel for these events. Other sales and marketing expenses include direct-to-consumer promotional programs, consulting, and advisory fees. We expect sales and marketing expenses to continue to increase in absolute dollars as we expand our commercial infrastructure to both drive and support our expected growth in revenue. However, we expect sales and marketing expenses to decrease as a percentage of revenue in the long term primarily as, and to the extent, our revenue grows.

Amortization of Intangible Assets

Amortization of intangible assets consist primarily of amortization expense on patent license asset, manufacturing license asset, technology, and customer relationships. We amortize finite lived intangible assets over the period of estimated benefit using the straight-line method. Indefinite lived intangible assets are tested for impairment annually or whenever events or circumstances indicate that the carrying amount of the asset (asset group) may not be recoverable. If impairment is indicated, we measure the amount of the impairment loss as the amount by which the carrying amount exceeds the fair value of the asset. Fair value is generally determined using a discounted future cash flow analysis.

Acquisition-Related Costs

Acquisition-related costs consist of expenses incurred related to the Contura acquisition.

Other Income (Expense), Net

Other income (expense), net consists primarily of interest expense payable under the Loan Agreement with Silicon Valley Bank and other debt arrangements, gains and losses on foreign currency transactions, net of interest income earned on cash equivalents.

Income Tax Expense (Benefit)

Income tax expense (benefit) primarily consists of losses benefited in certain foreign jurisdictions. We maintain a full valuation allowance for deferred tax assets in our domestic operations, including net operating loss carryforwards and research and development credits.

Results of Operations

The following table shows our results of operations for the three months ended March 31, 2022 and 2021 (in thousands, except percentages):

	Three Months Ended March 31,		Period to Period Change
	2022	2021	
Net revenue	\$ 48,420	\$ 34,373	\$ 14,047
Cost of goods sold	15,178	13,974	1,204
Gross profit	33,242	20,399	12,843
Gross Margin	68.7 %	59.3 %	
Operating expenses			
Research and development	11,236	9,369	1,867
General and administrative	10,013	6,626	3,387
Sales and marketing	33,063	20,928	12,135
Amortization of intangible assets	2,463	678	1,785
Acquisition-related costs	—	4,414	(4,414)
Total operating expenses	56,775	42,015	14,760
Loss from operations	(23,533)	(21,616)	(1,917)
Other income (expense)			
Interest income	43	8	35
Interest and other expense	(289)	(1,450)	1,161
Other expense, net	(246)	(1,442)	1,196
Loss before income tax benefit	(23,779)	(23,058)	(721)
Income tax benefit	(1,111)	(555)	(556)
Net loss	(22,668)	(22,503)	(165)
Foreign currency translation adjustment	(4,920)	(2,202)	(2,718)
Comprehensive loss	\$ (27,588)	\$ (24,705)	\$ (2,883)

Comparison of the Three Months Ended March 31, 2022 and 2021

Net Revenue

Net revenue was \$48.4 million for the three months ended March 31, 2022 and was primarily derived from the sale of our products to customers in the United States and certain international markets. Net revenue was \$34.4 million for the three months ended March 31, 2021 and was primarily derived from the sale of our r-SNM System to customers in the United States, Europe and Canada. The increase in net revenue is primarily due to increased sales of our products as we expanded our customer base in the U.S. and international markets and increased sales with our existing customer base.

Cost of Goods Sold and Gross Margin

We incurred \$15.2 million of cost of goods sold for the three months ended March 31, 2022. We incurred \$14.0 million of cost of goods sold for the three months ended March 31, 2021. Gross margin was 68.7% in the three months ended March 31, 2022, compared to 59.3% for the three months ended March 31, 2021. The increase in gross margin is primarily due to higher sales volumes and increased efficiencies resulting in higher absorption rates.

Research and Development Expenses

Research and development expenses increased \$1.9 million, or 19.9%, to \$11.2 million in the three months ended March 31, 2022, compared to \$9.4 million in the three months ended March 31, 2021. The increase in research and development expenses was primarily attributable to an increase of \$1.1 million in contract R&D and manufacturing costs, an increase of \$0.3 million in personnel costs including salaries and wages, stock-based compensation and other employee-related benefits, and an increase of \$0.2 million in royalty expense.

General and Administrative Expenses

General and administrative expenses increased \$3.4 million, or 51.1%, to \$10.0 million in the three months ended March 31, 2022, compared to \$6.6 million in the three months ended March 31, 2021, primarily as a result of an increase of \$2.7 million in legal costs.

Sales and Marketing Expenses

Sales and marketing expenses increased \$12.1 million, or 58.0%, to \$33.1 million in the three months ended March 31, 2022, compared to \$20.9 million in the three months ended March 31, 2021. The increase in sales and marketing expenses was primarily due to an increase of \$7.4 million related to personnel costs including salaries, wages, sales personnel commissions, stock-based compensation and other employee-related benefits, an increase of \$2.2 million related to travel expenses, and an increase of \$1.9 million related to direct-to-consumer programs and other advertising expenses.

Amortization of Intangible Assets

Amortization of intangible assets increased to \$2.5 million in the three months ended March 31, 2022, compared to \$0.7 million in the three months ended March 31, 2021. The increase in amortization of intangible assets was primarily due to an increase of technology and customer relationships acquired related to the Contura acquisition.

Acquisition-Related Costs

There were no acquisition-related costs in the three months ended March 31, 2022. Acquisition-related costs were \$4.4 million in the three months ended March 31, 2021 related to the Contura acquisition.

Other Expense, Net

Other expense, net was \$0.2 million in the three months ended March 31, 2022 consisting primarily of losses on foreign currency transactions. Other expense, net was \$1.4 million in the three months ended March 31, 2021 consisting primarily of interest expense incurred related to the Loan Agreement with Silicon Valley Bank. The decrease in other expense, net primarily relates to interest on higher outstanding debt balances during the three months ended March 31, 2021 and the related write-off of unamortized debt issuance costs.

Income Tax Benefit

Income tax benefit was \$1.1 million for the three months ended March 31, 2022 primarily related to losses in certain foreign jurisdictions. Income tax benefit was \$0.6 million for the three months ended March 31, 2021 primarily related to deferred tax assets generated in our foreign operations related to the Contura acquisition.

Liquidity and Capital Resources

We only began full-scale commercialization of our r-SNM System in late 2019. We have expended significant resources on research and development activities, growing our operations organization and building and training our sales organization.

We incurred net losses of \$22.7 million and \$22.5 million for the three months ended March 31, 2022 and 2021, respectively, and had an accumulated deficit of \$337.2 million as of March 31, 2022 compared to \$314.6 million at December 31, 2021. We expect to continue to spend a significant amount of our existing resources on sales and marketing activities as we continue to commercialize and market our products in the United States and internationally.

As of March 31, 2022, we had cash and cash equivalents of \$213.2 million compared to \$220.9 million at

December 31, 2021. We expect that our cash and cash equivalents on hand will be sufficient to fund our operations through at least the next 12 months. We fund our operations through a combination of proceeds from public offerings of our common stock and cash receipts from sales of our products. As of March 31, 2022, we had no outstanding borrowings.

We may need to raise additional financing in the future to facilitate our business operations. If we raise additional funds by issuing equity securities, our stockholders could experience dilution. Debt financing, if available, may involve covenants further restricting our operations or our ability to incur additional debt. Any debt financing or additional equity that we raise may contain terms that are not favorable to us or our stockholders. Additional financing may not be available at all, or in amounts or on terms acceptable to us. If we are unable to obtain additional financing when needed to satisfy our liquidity requirements, we may be required to scale back our operations.

Cash Flows

The following table presents a summary of our cash flow for the periods indicated (in thousands):

	Three Months Ended March 31,	
	2022	2021
Net cash provided by (used in)		
Operating activities	\$ (9,167)	\$ (25,583)
Investing activities	(291)	(140,864)
Financing activities	1,444	56,215
Effect of exchange rate changes on cash and cash equivalents	316	13
Net decrease in cash and cash equivalents	<u>\$ (7,698)</u>	<u>\$ (110,219)</u>

Net cash used in operating activities

Net cash used in operating activities was \$9.2 million for the three months ended March 31, 2022 and consisted primarily of a net loss of \$22.7 million, partially offset by non-cash charges of \$8.9 million and an increase from changes in net operating assets of \$4.6 million. Net operating assets consisted primarily of inventory and accounts receivable due to the commercial growth of our r-SNM System in the United States and the addition of Bulkamid sales. Non-cash charges consisted primarily of stock-based compensation and depreciation and amortization.

Net cash used in operating activities was \$25.6 million for the three months ended March 31, 2021 and consisted primarily of a net loss of \$22.5 million and a decrease from changes in net operating assets of \$9.4 million, partially offset by non-cash charges of \$6.4 million. Net operating assets consisted primarily of inventory due to the commercial growth of our r-SNM System in the United States. Non-cash charges consisted primarily of stock-based compensation.

Net cash used in investing activities

Net cash used in investing activities was \$0.3 million for the three months ended March 31, 2022 and consisted of purchases of property and equipment.

Net cash used in investing activities was \$140.9 million for the three months ended March 31, 2021 and consisted primarily of the \$140.7 million paid for the acquisition of Contura.

Net cash provided by financing activities

Net cash provided by financing activities was \$1.4 million for the three months ended March 31, 2022 and consisted of proceeds from exercise of stock options.

Net cash provided by financing activities was \$56.2 million for the three months ended March 31, 2021 and consisted primarily of \$75 million in net proceeds received in the Loan Agreement with Silicon Valley Bank in

connection with the Contura acquisition, partially offset by the pay down of \$21.5 million of the prior Loan Agreement with Silicon Valley Bank.

Indebtedness

In June 2021, the principal amount, accrued interest, accrued loan fees, and prepayment fees related to the term loan under the Loan and Security Agreement with Silicon Valley Bank entered into in February 2021, were paid in full. The unamortized debt issuance costs of \$4.4 million were expensed and recognized as interest expense.

In January 2021, the principal amount, accrued interest, accrued loan fees, and prepayment fees related to the term loan under the Loan and Security Agreement with Silicon Valley Bank entered into in February 2018, were paid in full. The unamortized debt issuance costs of \$0.4 million were expensed and recognized as interest expense.

We have no further indebtedness arrangements.

Critical Accounting Policies and Estimates

Our critical accounting policies and estimates are described in “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2021, as filed with the SEC on March 1, 2022. We have reviewed and determined that those critical accounting policies and estimates remain our critical accounting policies and estimates as of and for the three months ended March 31, 2022.

Recent Accounting Pronouncements

We have reviewed all recently issued standards and have determined that, other than as disclosed in Note 1 to our unaudited condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q, such standards will not have a significant impact on our condensed consolidated financial statements or do not otherwise apply to our operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risks in the ordinary course of our business. These risks primarily include interest rate risk, foreign currency exchange rate risk and inflation risk as follows:

Interest Rate Risk

We had cash and cash equivalents of \$213.2 million as of March 31, 2022, which came from public offerings of our common stock and cash receipts from our product sales. The goals of our investment policy are liquidity and capital preservation and we do not enter into investments for trading or speculative purposes. We believe that we do not have any material exposure to changes in the fair value of these assets as a result of changes in interest rates due to the short term nature of our cash and cash equivalents. A hypothetical 10% relative change in interest rates during any of the periods presented would not have had a material impact on our consolidated financial statements. We do not currently engage in hedging transactions to manage our exposure to interest rate risk.

Foreign Currency Exchange Rate Risk

As we expand internationally our results of operations and cash flows may become increasingly subject to fluctuations due to changes in foreign currency exchange rates. All of our revenue is denominated in U.S. dollars. Our expenses are generally denominated in the currencies in which our operations are located, which is primarily in the United States. The effect of a 10% adverse change in exchange rates on foreign denominated cash, receivables and payables would not have been material for the periods presented. As our operations in countries outside of the United States grow, our results of operations and cash flows may be subject to fluctuations due to changes in foreign currency exchange rates, which could harm our business in the future. To date, we have not entered into any material foreign currency hedging contracts although we may do so in the future.

Inflation Risk

Inflationary factors, such as increases in our cost of goods sold and selling and operating expenses, may adversely affect our operating results. Although we do not believe that inflation has had a material impact on our financial position or results of operations to date, a high rate of inflation in the future may have an adverse effect on

our ability to maintain and increase our gross margin and sales and marketing and operating expenses as a percentage of our revenue if the selling prices of our products do not increase as much as or more than these increased costs.

Item 4. Controls and Procedures.

Limitations on effectiveness of controls and procedures

In designing and evaluating our disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Evaluation of disclosure controls and procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated, as of the end of the period covered by this Quarterly Report on Form 10-Q, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of March 31, 2022 due to the material weakness in internal control over financial reporting, as described below.

Material Weakness in Internal Control Over Financial Reporting

In connection with the audit of our financial statements as of and for the year ended December 31, 2021, we identified a material weakness in our internal control over financial reporting. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

We determined that a material weakness exists relating to the determination of the fair values of identifiable intangible assets and contingent consideration liability related to business combination. This control deficiency creates a reasonable possibility that a material misstatement to the consolidated financial statements will not be prevented or detected on a timely basis.

Notwithstanding such material weakness in internal control over financial reporting, our management, including our Principal Executive Officer and our Chief Financial Officer, has concluded that our consolidated financial statements present fairly, in all material respects, our financial position, results of our operations and our cash flows for the periods presented in this Quarterly Report, in conformity with GAAP.

Remediation Plan

We have identified steps as further described below, to remediate the material weakness described in this Item 4 and to enhance our overall control environment. We are committed to ensuring that our internal controls over financial reporting are designed and operating effectively. Our remediation process includes, but is not limited to:

- Enhancing the design of controls, including the precision of the management review controls relating to key methodologies, assumptions and inputs used in the determination of the fair value of identifiable intangibles and a contingent consideration liability;
- Implementing a valuation review checklist that includes specific review attributes to ensure sufficient evidence of an effective review is documented and maintained to support management's conclusions; and
- Expanding personnel with appropriate experience to devote sufficient time and resources to our internal controls over fair value measurements.

We believe that these actions will remediate the material weakness. The weakness will not be considered remediated, however, until the applicable controls operate and management has concluded, through testing, that these controls are operating effectively.

As we continue to evaluate and test the remediation plan outlined above, we may also identify additional measures to address the material weakness or modify certain of the remediation procedures described above. Management, with the oversight of the Audit Committee, will continue to take steps necessary to remedy the material weakness to reinforce the overall design and capability of our control environment.

Changes in internal control over financial reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended March 31, 2022 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings.

There have been no material developments in the litigation matters disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2021, as filed with the SEC on March 1, 2022, during the quarter ended March 31, 2022.

Item 1A. Risk Factors.

You should carefully consider the information described in the “Risk Factors” section of our Annual Report on Form 10-K for the fiscal year ended December 31, 2021, as filed with the SEC on March 1, 2022. There have been no material changes from the risk factors disclosed in our recent SEC filings, including our most recently filed Form 10-K, as referenced above.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Item 6. Exhibits.**EXHIBIT INDEX**

I, Raymond W. Cohen, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Axonics, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Axonics, Inc. (the "Company") on Form 10-Q for the quarterly period ended March 31, 2022 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
